Please pass this Form on to the person or company contracted to build your stand

Please see the Event timetable on Page 7 of the manual, as well as some of the Rules and Regulations which form part of the contract between the Exhibitor and the Organiser.

Please pay special attention:

1. Should only one exhibitor wish to exceed 2,5m height or to build a double-storey stand subject to permission from the Exhibition Director, it shall be responsible for both sides of the dividing wall above 2,5m. This must be of a solid construction, suitably finished and decorated on the reverse side in a colour acceptable to the adjoining exhibitor, but carrying neither titles, devices, advertising matter nor exhibits on the elevation overlooking the single-storey stand. The dividing wall must be erected and dismantled throughout its total height by the exhibitor exceeding that height. Failure to comply with this regulation may result in the Organiser completing the work at the expense and risk of the exhibitor at fault. This will also apply to an exhibitor failing to erect partitioning between its own and the adjacent stand as well as to any exhibitor erecting a common partition of less than the height specified, except by mutual agreement.
2. No part of any stand or exhibit, including fascias, signs, corner posts or fittings, shall project into or overhang any aisle or obscure any fire or exit signs.
3. In a continuing vein, the freedom of all aisles is essential for the build-up and dismantling of the exhibition. No one may erect or place any scaffolding, trestles, cranes, hoists or other equipment or material which will impede, delay or stop work on any other site or in the aisles. It is also the responsibility of the exhibitor and its agents and employees to keep aisles clear (so far as is reasonably possible) of materials, packing cases, rubbish and equipment.
4. Fire alarms, hydrants, extinguishers, exit signs etc., must not be masked or obstructed.
5. To avoid a 20% surcharge, please ensure all orders plus payment reach us by no later than 4 August 2011.
6. The officially appointed electrical contractor shall have the right to enter any stand and examine the electric wiring, lighting, motors and accessories. All electrical contractors working on the exhibition stands shall supply the Organisers upon request with a Certificate of Compliance. **RIPCORDER IS NOT ALLOWED IN ANY CIRCUMSTANCES WHATSOEVER.** The Organiser reserves the right to refuse the connection of any stand not in compliance with applicable regulations and to limit the supply to any consumer.
7. No machining or cutting will be allowed in the Halls.
8. Stands must be completed by the deadline of 18h00 on 12 September 2011, to allow for final dressing and cleaning by the Organisers.
9. All stands must clearly display the stand number - this assists fire fighting and medical personnel to quickly find the exhibitor's site.
10. Should the stand or structure exceed 2,5m in height, or be a 2-storey structure, or have a raised floor or staircase, a drawing must be submitted to the contact person below. The drawing must also be accompanied by a letter of approval from a structural engineer. The plan must be submitted at least 30 days before the opening of the exhibition.

1. Electrical Usage/Consumption	EQUIPMENT TO BE USED ON THE STAND	KILOWATT RATING	AMPERAGE
It is important that the electrical contractors appointed to the event know which appliances will be utilised at the event since they need to plan electrical distribution within the constraints of the venue. Kindly list the electrical equipment you will be using on your stand, plus the power they draw. Should information given not be correct, the Organisers reserve the right to insist on extra electricity being ordered if available or alternatively prohibit the use of extra items.			

NB: The cost of distribution boards includes un-metered electricity charges.

Please use the grid to indicate as accurately as possible the desired location of the items you are ordering. Use codes on Form 5 for easy identification of items.

Grid shows each square at 500mm x 500mm or 1m x 1m
